WHY?

Youth work is constantly evolving and this project aims to create programs that will help youth work to make step forward in dealing with conflict transformation. Youth work started its shift towards online activism. This type of participation has shown to be much more important to youngsters as they've been spending more and more time on social networks and these are the places where they learn, make new friendships and create their opinions about different topics. That is why the possibilities for exchange, learning and real engagement should be used specially for the topic of online conflict transformation as this is the space where young people can be more open towards others than they are in their real life communities.

Project is supported by Erasmus+ Programme of the European Union, KA2 – Capacity Building in the field of Youth
